Memo to File:

Re: ACT/039/006

On May 2, 1978 Brian spoke with Bill Boley, U.S. Forest Service about the status of U.S. Ferto's mining plan. Mr. Boley denied that U.S. Ferto received approval for their mining plan on June 8, 1977. He did say that the title question to U.S. Ferto's claims was about to be resolved and that the Manti Forest would soon be working with U.S. Ferto in putting a mining plan together. He will call on the Division to be a partner in preparing the mining and reclamation plan.
